Dear Senator Alex X. Mooney:

On behalf of the Citizens for the Preservation of Pleasant Valley (CPPV), thank you for your October 28, 2009 letter contacting the State Highway Administration (SHA) regarding the safety of Route 340 between the Potomac River and Route 17.

We have met with SHA engineer Anthony Crawford and look forward to continued dialogue regarding the most effective solutions to traffic problems in the area. We recognize that there are many facets to the traffic problem requiring thoughtful responses. He informed us of actions that he could take within the year, and other issues which may take much more time and money. In our discussions with members of the community, it seems that almost everyone, even those who did not sign the petition, agree with both extending the turn lanes and with the construction barriers. However, some feel that the extension for Rt 67 may not be the optimal answer. We look forward to working with SHA.

Eric Whitenton, President
Citizens for the Preservation of Pleasant Valley

cc: Anthony Crawford, SHA Engineer
