ROUTE 340 BRIDGE WEBCAM (BETWEEN MD AND VA)

These movies are available on our website at “upshotmd.org/webcam.html”. They are time-lapse movies, greatly sped up.

April 1, 2011: The bridge was heavy stop-n'-go for FOUR HOURS, with a lot more stop than go. No joke.

(file “20110401nojoke.wmv”)

January 26, 2011: This repeating time-lapse video shows trees sag as snow piles up on them.

(file “20110126snowsagstrees.wmv”)

January 17, 2011: At night with no apparent construction activity. A truck stops for two minutes as traffic backs up. While not a long delay, one can't help but wonder why the driver had to stop there.

(file “20110117truckstop.wmv”)

December 10, 2010: Snow.

(file “20101210snow.wmv”)

November 23, 2010: Stop and go as crane lowers material over the sides of bridge.

(file “20101123crane.wmv”)

November 23, 2010: Fog hangs above river and bridge.

(file “20101123hoveringfog.wmv”)

October 27, 2010: Clouds rise above the fall colors.

(file “20101027fallclouds.wmv”)

September 27, 2010: Clouds seem to rise from the mountain.

(file “20100927risingclouds.wmv”)

September 14, 2010: Stop and go traveling from Maryland to Virginia.

(file “20100914multistops.wmv”)

September 6, 2010: 10 minute standstill going from Maryland to Virginia.
(file "20100906stoppedfor10minutes.wmv")

September 1, 2010: Stop and go traveling from Virginia to Maryland due to work on the bridge. The white machine is a crane which hangs over the edge.
(file "20100901workingonbridge.wmv")

August 16, 2010 through August 19, 2010: Stop and go traveling from Maryland to Virginia. Our webcam can not see the ongoing road improvements in Maryland which do help.
(files "20100816multistops.wmv" through "20100819multistops.wmv")

July 26, 2010: Traffic moves only a few brief times in an hour. Once traffic does begin to move, traffic is still heavy for another hour.
(file "20100726houruponhour.wmv")

July 3, 2010: After the sunsets, you can see a few bursts of fireworks over the nearby town of Loudoun Heights.
(file "20100703sunsetandfireworks.wmv")

June 27, 2010: White van slowing traffic.
(file "20100627whitevan.wmv")

June 22, 2010: Red machines performing maintenance.
(file "20100622redmachines.wmv")

June 17, 2010: Stop and go traffic.
(file "20100617multistops.wmv")

June 12, 2010: Completely stopped for 20 minutes.
(file "20100612stoppedfor20minutes.wmv")

June 10, 2010: The fog burns off as the sun rises.
(file "20100610fogburnsunrise.wmv")

May 29, 2010: Clouds are created and then evaporate, sometimes so rapidly that they seem to travel upwind.
(file "20100529cloudcreation.wmv")

May 17, 2010: Clouds seem to dance and play.
(file "20100517risingclouds.wmv")

April 14, 2010: Smoke from a (hopefully) controlled burn.
(file "20100414smoke.wmv")

April 13, 2010: Traffic slowdown. Police cars manage traffic for about an hour.
(file "20100413slowdown.wmv")
